

National Risk Index - Metadata

Tags National Risk Index, NRI, The National Risk Index, The NRI, Flood Risk, Risk Assessment, Natural Hazard Risk, Planning, Mitigation, December 2025 Release

Summary

The National Risk Index contains county and Census tract-level data for the Risk Index, Expected Annual Loss, Social Vulnerability, and Community Resilience. The National Risk Index data helps to illustrate the communities most at risk for 18 natural hazards across the United States and territories.

Description

The National Risk Index data helps to illustrate the communities most at risk for 18 natural hazards across the United States and territories: avalanche, coastal flooding, cold wave, drought, earthquake, hail, heat wave, hurricane, ice storm, inland flooding, landslide, lightning, strong wind, tornado, tsunami, volcanic activity, wildfire, and winter weather. The National Risk Index data provides Risk Index values, scores and ratings based on data for Expected Annual Loss due to natural hazards, Social Vulnerability, and Community Resilience. Separate values, scores and ratings are also provided for Expected Annual Loss, Social Vulnerability, and Community Resilience. For the Risk Index and Expected Annual Loss, values, scores and ratings can be viewed as a composite score for all hazards or individually for each of the 18 hazard types.

Sources for Expected Annual Loss data include:

- Arizona State University's Center for Emergency Management and Homeland Security
- California Department of Conservation – Geological Survey
- Colorado Avalanche Information Center
- Snow Data Assimilation System
- National Water and Climate Center
- Snow Survey and Water Supply Forecasting Program
- Snow Telemetry Network
- Northern Hemisphere 0.25 Degree Resolution Machine Learning Snow Depth Data
- CoreLogic's Flood Services
- Federal Emergency Management Agency
- National Flood Insurance Program
- FEMA Natural Hazards Risk Assessment Program
- Humanitarian Data Exchange
- Iowa State University's Iowa Environmental Mesonet
- Multi-Resolution Land Characteristics Consortium
- National Earthquake Hazards Reduction Program
- National Oceanic and Atmospheric Administration's National Centers for Environmental Information
- National Oceanic and Atmospheric Administration's National Hurricane Center
- National Oceanic and Atmospheric Administration's National Weather Service
- National Oceanic and Atmospheric Administration's Office for Coastal Management

- National Oceanic and Atmospheric Administration's National Geophysical Data Center
- National Oceanic and Atmospheric Administration's Storm Prediction Center
- U.S. Army Corps of Engineers' Cold Regions Research and Engineering Laboratory
- U.S. Census Bureau
- U.S. Department of Agriculture's National Agricultural Statistics Service
- U.S. Forest Service's Fire Modeling Institute's Missoula Fire Sciences Lab
- U.S. Geological Survey
- U.S. Geological Survey's Landslide Hazards Program
- U.S. Geological Survey Western Geographic Science Center Hazard Vulnerability Team
- United Nations Office for Disaster Risk Reduction
- University of Alaska – Fairbanks' Alaska Earthquake Center
- University of Nebraska – Lincoln's National Drought Mitigation Center

Data for Social Vulnerability are provided by the U.S. Census Community Resilience Estimate, and data for Community Resilience are obtained from the University of South Carolina's Hazards and Vulnerability Research Institute's 2020 Baseline Resilience Indicators for Communities. These obtained data were used to create a FEMA modified version of the Baseline Resilience Indicators for Communities for use in the National Risk Index dataset.

The source of the boundaries for counties and Census tracts are based on the U.S. Census Bureau's 2021 TIGER/Line shapefiles, except for Connecticut which uses the 2024 TIGER/Line shapefiles. Building value and population exposures for communities are based on FEMA's Hazus 6.0 and inflation adjusted to December 2024 dollars. Agriculture values are based on the USDA 2017 Census of Agriculture and inflation adjusted to December 2024 dollars.

Terms & Conditions

FEMA offers some of its public data in machine readable format via an Application Programming Interface (API) and direct data download services. These services are offered subject to your acceptance of the terms and conditions contained herein as well as the FEMA Privacy Policy.

Summary

Respect the National Risk Index dataset API, downloadable datasets, and content on this website. Use the site in a lawful manner. Do not modify the site or attempt to use it to publish or transmit malicious

software or content. FEMA shall not be liable for any damages resulting from the use of this website, API services, downloadable datasets or content. Do not attempt to reverse engineer the dataset. We may suspend your access to this website if we feel you have not complied with these terms and conditions.

Scope

All of the content, documentation, and related materials made available to you through the API and downloadable datasets are subject to these terms. Access to or use of the API services, downloadable datasets or content constitutes acceptance of these terms.

Secondary Use

Data accessed through the National Risk Index dataset API or downloadable datasets do not include controls over its end use. The National Risk Index data are meant for planning purposes only. This National Risk Index dataset was created for broad nationwide comparisons and is not a substitute for localized risk assessment analysis. Nationwide datasets used as inputs for the National Risk Index data are, in many cases, not as accurate as available local data. Users with access to local data for each National Risk Index dataset risk factor should consider substituting the National Risk Index data with local data. If a user decides to download the National Risk Index data and substitute it with local data, the user assumes responsibility for the accuracy of the data. However, as the data owner, FEMA retains version control. Once the data has been downloaded from the API, FEMA cannot verify the quality and/or timeliness of any analysis conducted using data retrieved.

No Reverse Engineering of Data

By accessing the National Risk Index dataset API or downloadable datasets, you agree that the data will be used only in accordance with these Terms and Conditions. You further agree not to reverse engineer, decompile, or attempt to access or derive the underlying datasets, structures, or information from these datasets. FEMA may rescind your use of the data if FEMA believes that it does not serve the public interest. You agree you will cease using the data and destroy any copy you may have if requested by FEMA.

Citing Data

- Users must clearly state that “This product uses the Federal Emergency Management Agency’s National Risk Index dataset API or downloadable datasets but is not endorsed by FEMA. The Federal Government or FEMA cannot vouch for the data or analyses derived from these data after the data have been retrieved from the Agency’s website(s).”
- Users should cite the specific API endpoint or downloadable dataset (including the version) either by name or preferably by URL. Either the dataset page or the API endpoint URL’s may be used.
- Users should cite the date and preferably the time when the FEMA data are accessed, retrieved, or downloaded using the API or from the OpenFEMA site.
- The logos and/or seals of the Federal Emergency Management Agency and the Department of Homeland Security (DHS) shall not be used without prior written authorization from the appropriate Agency or Department.
 - Example:
 - Federal Emergency Management Agency (FEMA), National Risk Index Dataset: National Risk Index County_National Risk Index_Rating_Composite - v1.20.

[3ca338d](#) on December 13, 2025, 12:34 PM EST. This product uses the FEMA National Risk Index dataset API or downloadable datasets but is not endorsed by FEMA. The Federal Government or FEMA cannot vouch for the data or analyses derived from these data after the data have been retrieved from the Agency's website(s).

Modification or False Representation of Content

You may not claim or represent that content accessed through the National Risk Index dataset API or downloadable datasets and modified by you is attributable to FEMA or FEMA.gov.

Changes

FEMA reserves the right, at its sole discretion, to modify or replace these terms, in whole or in part. Your continued use of or access to the National Risk Index dataset API and downloadable datasets following posting of any changes to these terms, constitutes acceptance of those modified terms. FEMA may, in the future, offer new services and/or features. Such new features and/or services shall be subject to these terms and conditions.

Disclaimer of Warranties

The National Risk Index dataset API and downloadable datasets are provided "as is" and on an "as-available" basis. FEMA hereby disclaims all warranties of any kind, express or implied, including without limitation the warranties of merchantability, fitness for a particular purpose, and non-infringement. FEMA makes no warranty that the services will be error free or that access thereto will be continuous or uninterrupted.

General Representations

You hereby warrant that:

1. Your use of the services will be in strict accordance with these terms and all applicable laws and regulations, and
2. Your use of the services will not infringe or misappropriate the intellectual property rights of any third party.

Indemnification

You agree to indemnify and hold harmless FEMA, its contractors, employees, agents, and the like from and against any and all claims and expenses arising out of your use of the APIs, including but not limited to violation of these terms. This indemnification clause shall not apply to federal government entities.

Miscellaneous

These terms may only be modified by the posting of a revised version on this page by FEMA. FEMA may monitor your use of its services to improve the service or to ensure compliance with these terms.

Disputes

Any disputes arising out of these terms and access to or use of the services shall be governed by federal law.

No Waiver of Rights

FEMA's failure to exercise or enforce any right or provision included in these terms shall not constitute waiver of such right or provision.

Service Termination

If you do not wish to abide by these terms, you must refrain from use of the services.
